CxSense System

Share and collaborate reassured that your sensitive information is always protected.

The CxSense ~~Smart-file~~ patent pending technology enables corporations to “own” their information - track, control and secure files and documents anytime, anywhere even when data is shared with 3rd parties.

Document Governor

Provide unmatched automated capabilities of controlling documents and user actions such as: Open, Print, Edit, based on document content, location or network information.

Information Risk Analyzer

Stop and prevent information-risk exposure by quickly spotting key risk areas where sensitive information is exposed or lost. Identify and pinpoint usage violations. Know exactly when, where and who uses your key files.

Market Need

Document protection has been identified as the weakest link in information security. A company's strong need to share information and collaborate is hampered by the requirements to comply with numerous regulations requiring data protection such as SOX, HIPAA, CA-1386.

Covertix's CxSense System is the only automatic, user-friendly solution for foolproof document control.
